

Now use PSC TubularGuider to safely work with suspended tubular loads without getting injured due to pinch and crush related spots. The PSC TubularGuider® features non-slip grips, locking mechanism and super strong aluminium shaft. The Dual Release uses a spring loaded noose release to extend the cable through the tool to release the tubular or the slide control which instantly drops the noose from the tool.

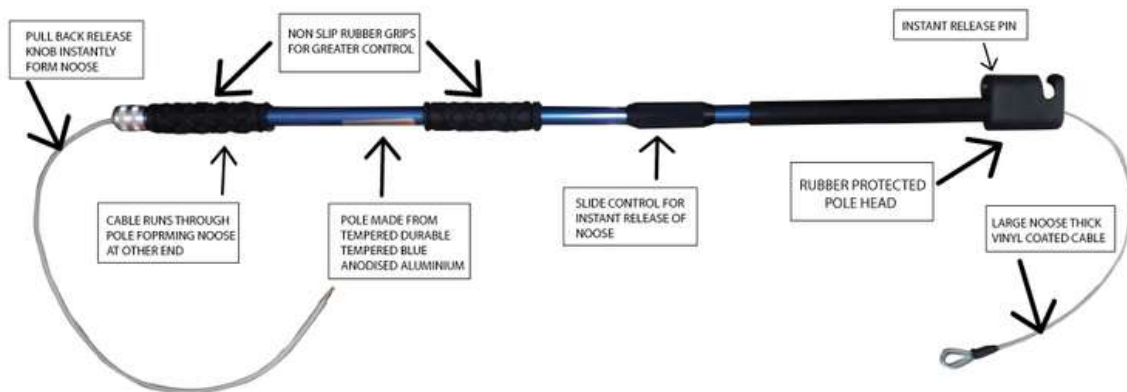

Available in 3 lengths- 3 feet, 4 feet & 5 feet
