

# HANDS-OFF SAFETY TOOL

## PSC LIFT ASSIST MANUAL LIFTING AIDS

**PSC Lift Assist Manual Lifting Tools** helps with the safer handling of pipe, ironwork, tubing sections. They reduce unnecessary bending and lifting activities. It also reduces possible chances of hand and finger injuries associated with lifting carrying the small equipment with bare hands. The manual lifting aids are used with chicksan and bop choke valves, pup joints, fishing tools, pipe, tubing, deck cargo etc.

### PSC LIFT ASSIST MANUAL LIFTING AID - SINGLE HANDLE

- Easy to fit - simply pass the strop under the load then pass handle through the strop eye to make a "choke" hitch. Alternatively, the eye may be slipped over the pipe ends.
- Working Load Limit (WLL): 75kg
- Minimum Breaking Load: 750kg
- Length - 50mm x 900mm
- Ordering Code - #PSC-SH-100

### PSC LIFT ASSIST MANUAL LIFTING AID - DOUBLE HANDLE

- Easy to fit - simply pass one handle under the load so that the strop wraps around the pipe section
- Lift by cradling the load, with each operator taking up a handle, one each side of the load
- Working Load Limit (WLL): 100kg
- Minimum Breaking Load: 1000kg
- Length - 50mm x 1500mm
- Ordering Code - #PSC-DH-100

### PSC LIFT ASSIST MANUAL LIFTING AID - CHOKE VALVE STROP

- Designed to aid in the safer handling of 2" chicksan valves.
- To fit simply pass the handling straps under the valve connection butts. The strop with the adjacent velcro retaining strap should be passed under the male connection. Once in place, pass the velcro strap under the opposite side horizontal link strop and secure back on itself. Ensure that strops are not against any sharp edges. Lift by cradling the load, with each operator taking up a handle, one each side of the load.
- Working Load Limit (WLL): 50kg
- Minimum Breaking Load: 500kg
- Ordering Code - #PSC-CV

\* Warning: this product is for manual handling only and should not be used as part of any rigging or mechanical lifting arrangement.
