

PSC EZY-LIFT PIPE LIFTING TOOL

PSC EZY-Lift is the simple pipe lifting tool designed to keep the wrist and hand in a neutral position. It avoids strain, prevent pinched fingers and cuts from sharp surfaces. The ergonomic design is to avoid strain when used with proper body positioning and lifting. This is a CNC cut metal piece covered with a rubberized coating.

A Project Sales Corp Product

We simulated the right way to lift and hold a pipe and this tool is accordingly designed to allow a person to keep the wrist in a neutral position. Use of bare hands as an alternative to hold a pipe at the entry and exit could cause cuts or any other pipe dropping incident.

***FACT CHECK**

Avoid hand and finger injuries while handling pipes. Sharp edges can cause lacerations and cuts. Lifting from surfaces can cause pinched fingers. Improper lifting can cause body strain.

FEATURES

- With the **PSC EZY-lift**, just slide the tool into the pipe on either end and **lift pipes easily, safely and ergonomically.**
- CNC Machined metal plate coated with a rubberized black paint and the jaw width **can handle pipes with thickness upto 4-5 mm.**
- Ergonomic and simple to handle.
- Need to use it as a set of 2 pieces.
- Reliable & cost effective.
- Easy & effective grip mechanism.
- Productive & uncomplicated tool.

DOS & DON'T's of PSC EZY-LIFT PIPE LIFTING TOOL

PSC EZY-Lift is the simple pipe lifting tool designed to keep the wrist and hand in a neutral position. It avoids strain, prevent pinched fingers and cuts from sharp surfaces. The ergonomic design is to avoid strain when used with proper body positioning and lifting. This is a CNC cut metal piece covered with a rubberized coating.

A Project Sales Corp Product

DOs

- PSC EZY-Lift pipe lifter is designed for lifting small pipes by **“hands”** only.
- When holding the pipe please keep your hand at an angle that allows the tool to be a natural extension of your hands.
- PSC EZY-Lift is designed to use as a set of 2 pieces with one person holding at each end of the pipe.
- When engaging a pipe please ensure that the lifting arm of the pipe lifter is completely inserted into the pipe.
- Wearing appropriate gloves is a must while using the PSC EZY-Lift.
- PSC EZY-Lift has a rubberized coating for better hands safety.
- Please keep it clean and carefully, when not in use.
- Do refer to your company policies regarding permissible limit for lifting by hand.

DON'Ts

- PSC EZY-Lift pipe lifter is not designed for mechanical lifting activities. Do not attach hooks, cables or chains for lifting.
- Never use PSC EZY-Lift for **OVERHEAD LIFTING!** It is designed for hand operation only.
- Do not use PSC EZY-Lift set of 2 pieces for lifting anything over 200 kgs by hand.
- Do not try to hammer the EZY-Lift on to a thicker pipe other than what it is originally designed.
- For heavier pipes where 2 people are required to lift on either side please use PSC Double Handle Lift Assist. Please do not modify the tool, like drilling, thinning, hammering or widening of the mouth or using it as a hammer.
- Use this tool for pipe lifting activities only. Do not use it as beam lifting clamp.
